

S/P/A[®] POSITIONING BANDS

S/P/A[®] POSITIONING BANDS

In the field of automated orbital welding S/P/A[®] offers a wide range of guide rings for orbital welding machines as well as for weld-test-devices. All Positioning Bands can be made out of stainless steel, various kind of spring steel or DUPLEX steel. A special designed latch mechanism ensures an easy set-up of the bands for i. e. only one service technician. Most of our latch mechanisms are made to fit any radius and diameter.

This offers big advantages when it comes to spare parts stock. The reliable workmanship of the bands meets customers' highest quality requirements.

ADVANTAGES

- + state-of-the-art workmanship of high quality materials
- + easy to set-up due to a special latch mechanism
- + all sizes available on short notice
- + high durability and performance of the bands
- + good price-performance-ratio
- + various steel grades available

APPLICATIONS

We produce Positioning Bands for following systems:

AMI ArcMachines* – USA
Comet* – England
CRC Evans* – USA/UK
Firefly* – England
Passo/Presto – Italy
